

WE WILL BE HIRING!

This spring, we will be looking for someone to join our team as an

AmeriCorps
Environmental
Education Intern

Garden of the Salish Sea Curriculum is a novel K-12 environmental science program that uses shellfish as a vehicle to teach science and stewardship. Inspired to practice watershed healthy habits, students are empowered to pursue conservation and science. Additionally, we engage the general public in ocean conservation education through outreach events and community partnerships. We are an affiliate of the non-profit organization Pacific Shellfish Institute.

Requirements:

- Be vaccinated and boosted against COVID-19.
- College-level coursework in education.
- Good communication skills.
- Ability to work independently and collaborate in a group.
- Technology to work from home, with experience working in Google Drive.
- Reliable transportation.

Send your Letter of Interest, Resume, Transcript, and Letter of Recommendation to:

piperolsenwork@gmail.com

In this position, you will:

- Gain hands-on experience teaching environmental education in K-12 Whatcom County classrooms.
- Develop skills in curriculum development and lesson-planning.
- Engage the public through outreach events.
- Work at least 300 hours over your term.
- Complete a final project.

Benefits:

- Gain training and work experience in both environmental education and outreach.
- Make a difference in your community.
- Receive a stipend for your work and mileage reimbursement.
 - Amount negotiable.
- Receive a \$1,459.26 education credit from AmeriCorps
- Receive a letter of recommendation and a reference for future employment.
